

## Sustainable investment means an investment in an economic

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: ODIN Global LEI: 213800MQPQ279J6NBS95

### **Environmental and/or social characteristics** Did this financial product have a sustainable investment objective? No **✓** It promoted environmental/social characteristics and while it It made sustainable investments with an **V** did not have as its objective sustainable investment, it had a environmental objective: proportion of 22,5% of sustainable investments in economic activities that qualify as environmentally sustainable under the **EU Taxonomy** med et miljømål i økonomiske aktiviteter som anses som miljømessig bærekraftige i samsvar med EUs taksonomi with an environmental objective in economic Ш in economic activities that do not qualify $\overline{}$ activities that do not qualify as environmentally as environmentally sustainable under the EU Taxonomy sustainable under the EU Taxonomy with a social objective $\overline{\mathbf{A}}$ It made sustainable investments with a social It promoted environmental/social characteristics but did not objective: make any sustainable investments

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental characteristics via investments in companies that are expected to contribute to the UN Sustainable Development Goals (SDGs) on the environment. The Fund excludes companies that are associated with violations of international norms and conventions related to the environment. The Fund also excludes companies with revenues from fossil fuels and companies with unacceptably high greenhouse gas emissions. The Fund takes the most important negative impacts on sustainability factors (PAI indicators) related to the environment and climate into consideration when analysing individual companies.

The Fund promotes social characteristics via investments in companies that are expected to contribute to the UN Sustainable Development Goals (SDGs) on social issues. The Fund excludes companies that are associated with violations of international norms and conventions related to human rights and workers rights, and companies where the risk of contributing to corruption and bribery is high. The Fund also excludes companies that produce, tobacco, alcohol, cannabis, pornography, or that offer or are engaged in gambling. The Fund takes the most important negative impacts on sustainability factors related to social issues into consideration.

The Fund had a proportion of sustainable investments in companies with revenues from activities that contribute to the UN Sustainable Development Goals on the environment, including Goal 7 "Affordable and clean energy" and Goal 13 "Climate Action". The Fund also had sustainable investments in companies with revenues from activities that contribute to the UN Sustainable Development Goals on social issues, including Goal 3 "Good health and well-being".

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

## How did the sustainability indicators perform?

## The Fund's ESG-risk level – Low

In 2023, the fund's ESG-risk level was Medium

Sustainalytics is the data provider and assesses companies' ESG risks There are five risk categories: negligible, low, medium, high and severe. (For more information on the ESG ratings see: https://www.sustainalytics.com/esg-ratings)

## **Exclusions**

No new companies were excluded due to violations of the product criteria in this, or last, year due to violations of the product criteria in Odin's Policy for Responsible Investments.

No new companies were excluded this, or last, year due to violation of the norm criteria in Odin's Policy for Responsible Investments.

## The Fund's carbon intensity 10,76 tCO2eq/mEUR

In 2023 the Fund's carbon intensity was 8,93 tCO2eq/mEUR.

The carbon intensity shows the ratio of issuers' total emissions relative to their revenues, adjusted for portfolio weight.

## Use of voting rights - 100%

In 2023 the use of voting rights was 91%.

The figure shows the share of the voting rights exercised by the Fund at the annual general meeting.

## Dialogues with companies - 7

In 2023 the number of dialogues was 9.

Number of dialogues with companies regarding ESG-related topics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and antibribery matters.

The Fund had sustainable investments in companies with revenues from activities that contribute to the UN Sustainable Development Goals on the environment, including Goal 7 "Affordable and clean energy" and Goal 13 "Climate Action". The Fund has sustainable investments in companies with revenues from activities that contribute to the UN Sustainable Development Goals on social issues, including Goal 3 "Good health and well-being".

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund's sustainable investments fulfilled the requirements of the Sustainable and Responsible Investment Policy for Odin Forvaltning:

- None of the investments were in companies with revenues from excluded sectors.
- None of the investments were in companies in breach of international norms and conventions.
- None of the investments were in companies that have activities that in our judgement cause significant negative impacts on sustainability factors (the PAI indicators).

### How were the indicators for adverse impacts on sustainability factors taken into account?

All companies in the Fund are assessed in terms of ESG. This assessment includes an analysis of the company's impact on the most significant negative impacts on sustainability factors as defined by the EU. Data has been obtained from an independent analysis provider and an assessment of PAI indicators has been performed on each company. Where data was not available from the external provider, the fund manager has made an independet assessment based on in-depth knowledge of each individual company. Via a dialogue, the Fund has engaged portfolio companies to ensure better information and good risk management of the companies' impact on the relevant and most significant negative sustainability impacts.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

### Nærmere opplysninger:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. There were no breaches of these guidelines for any of the Fund's investments.

The EU Taxonomy for sustainable activities sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Data has been obtained from an independent data provider and an assessment of the most important negative impacts has been made. For some of the indicators, the Fund has absolute thresholds that companies cannot exceed. This applies to the indicators that largely overlap with the Sustainable and Responsible Investment Policy for Odin Forvaltning, such as indicators 4, 5, 10 and 14. No companies were in breach of these indicators this year. For the other indicators, the Fund focuses on seeing a positive trend in the figures over time. Several of the indicators have not been common for companies to report on. This applies in particular to indicators 5, 6, 8, 9, 11 and 12, where there is very low coverage in the reported figures. Where data is not available from an external supplier or the company's own reporting, the fund manager has made a separate assessment of the company's performance for relevant indicators. By means of dialogue and exercising voting rights, the Fund has engaged portfolio companies to ensure better information and good risk management of the companies' impact on the relevant and most important negative sustainability impacts.

#	PAI-indikator	Enhet	Resultat
		Scope 1 (tCO2-eq.)	1951,1
1	Greenhouse gas emissions	Scope 2 (tCO2-eq.)	2559,0

## What was the proportion of sustainability-related investments?

## What was the asset allocation?

All of the Fund's investments are covered by Odin's Sustainable and Responsible Investment Policy. This means that there are clear exclusion criteria detailing what the Fund may not invest in. An assessment is made of the ESG risk level in all existing and potential investments in the Fund.

In which economic sectors were the investments made?

Sector	%Weight	Revenues related to fossil fuels (Y/N)
Information technology	31,18 %	No
Industrials	29,02 %	No
Financials	15,88 %	No
Health care	14,20 %	No
Telecommunication services	5,45 %	No
Consumer discretionary	3,47 %	No
Consumer staples	0,01 %	No
Total sectors not related to fossil fuels	99 %	
Total sectors related to fossil fuels		0 %

The remaining investment funds are cash deposits in bank accounts.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

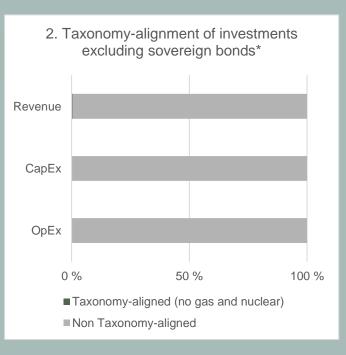

The Fund has not committed to a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in activities related to fossil gas and/or nuclear energy aligned with the EU Taxonomy¹?			
Yes			
☐ In fossil gas	☐ In nuclear energy		

The graph below displays in green the percentage of investments that were aligned with the EU Taxonomy. As there is no suitable method for determining the Taxonomy-alignment for sovereign bonds,\* the first graph shows the Taxonomyalignment of all investments of the financial product including sovereign bonds, while the second graph shows the I product excluding sovereign bonds.

Taxonomy-a	alignment onl	ly for the	investments of	the	finand	cie
Taxonomy-alignment of investments including sovereign bonds*						
Revenue						
CapEx						
OpEx						
0	%	50	%	100	%	
■Taxonomy-aligned (no gas and nuclear) ■Non Taxonomy-aligned						
*For the purpose of these graphs, "sovereign bonds" const						

✓ No

ist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments e.g. for a transition to a green economy
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any other environmental objectives of the EU Taxonomy (see the explanatory note in the margin to the left). The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

What was the share of investments made in transitional and enabling activities?

The share investments in transitional and enabling activities have not yet been mapped.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	2023	2024
Revenue	2 %	0 %
CapEx	0 %	0 %
OpEx	0 %	0 %

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund had sustainable investments in companies with revenues from activities that contribute to the UN Sustainable Development Goals on the environment, including Goal 7 "Affordable and clean energy" and Goal 13 "Climate Action". The share is 15%

What was the share of socially sustainable investments?

The Fund has sustainable investments in companies with revenues from activities that contribute to the UN Sustainable Development Goals on social issues, including Goal 3 "Good health and well-being" at 7%.

What investments were included under "Other," what was their purpose, and were there any minimum environmental or social safeguards?

No investments are included under "Other."

What actions have been taken to meet the environmental characteristics and/or social characteristics during the reference period?

The fund manager conducts an ESG analysis for all the companies it invests in and exercises active ownership by engaging in dialogue and exercising voting rights with the companies in the Fund. Investments are also screened quarterly for non-compliance with the Sustainable and Responsible Investment Policy for Odin Forvaltning In addition, the Fund's principle adverse impacts (PAIs), and impact on the UN's Sustainable Development Goals (SDGs) are monitored.
