This semi-annual report was originally prepared in Norwegian. This is an unofficial translated version and no liability is assumed for any errors or ambiguities that may have arisen in connection with the translation. The original version of this semi-annual report is available in Norwegian and can be ordered from ODIN Fund Management.

Statements in this semi-annual report reflect ODIN's views on the market at the time when the semi-annual report was published.

This report shows past performance. Past performance is no guarantee for future performance. Future performance will depend on things such as movements in the market, the manager's skills, the fund's risk level and the costs of managing the funds. The value of the fund may decrease as a result of a fall in share prices. All return figures are stated in NOK, unless otherwise stated.

The Company is a fully owned subsidiary of SpareBank 1 Gruppen AS

*«We own great companies, and
we manage our clients' money as
though they were our own.»*

- Senior Portfolio Manager
Oddbjørn Dybvad

Our vision

ODIN creates value for the future

Value creation is what we work with at all levels within the organisation:

- We create value for our unit holders through good management and advice
- We create value for our employees through work that gives them personal and professional development
- We create value for our owners through good results

As one of the leading asset managers in the Nordic region, we work every day to create value for our unitholders. The market lives its own life, but the most important for us are the companies we own and that they create value for the future.

Comments from the CEO

Human Capital

I am currently reading Dream Big by Cristiane Correra. It tells the story of Jorge Paulo Lemann from Brazil. Lemann started with two empty hands and is today one of the largest owners of the world's leading brewers, AB Inbev. With a fortune of USD 32 billion, he is ranked the world's 19th richest person.

Lemann got a good start with an education from Harvard in the US, although his first attempt at starting a brokerage firm went bankrupt when he was just 26. He did not lose courage and started again.

The bankruptcy taught Lemann that he had to take a different approach than his competitors. He had to build a corporate culture that stood out. He did this by recruiting on the basis of different criteria than the brokerage firms with which he was competing. While his competitors hired well-educated people from good families, Lemann's brokerage firm, Garantia, only hired PSDs:

PSDs stands for poor, smart and a deep desire to get rich.

The formula worked and Garantia became a success.

Lemann wanted to move on and he has since invested in retail chains and more recently in brewers. His first was Brahma, a local brewer in Brazil. Brahma then acquired its competitor, Antarctica, and formed Ambev. Next Inbev was formed when Ambev was acquired by Belgian Interbrew. Lemann and his partners became the largest individual owners of Inbev. Lemann's next move was Inbev's acquisition of Anheuser-Busch. The company was an American icon, best known for the world's biggest beer brand, Budweiser.

In an interview, Lemann was asked the reason behind the acquisition of Anheuser-Busch. His answer was as clear as it was surprising:

"We had so many talented and dedicated young people in Inbev; we had to give them new challenges."

The reason was neither synergies nor market power. It was Inbev's corporate culture that would be transferred to Anheuser-Busch. Lemann was right. Inbev's culture was transferred to Anheuser-Busch. It was after this that the results started to improve. The acquisition was a big lift for Inbev, but has generated a lot of value.

The story shows that good companies are built by talented people. A talented management team is therefore one of the most important criteria we look for when we make our investments in ODIN.

«Good people, working together make the firm great»

Jorge Paulo Lemann

A handwritten signature in black ink, appearing to read "Rune Selmar".

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. The fund's share price fluctuations over the past five years put the fund in category 6.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

ODIN Forvaltning employees may trade for their own account in several types of financial instruments. This means that ODIN Forvaltning employees may own securities in companies that are referred to in this report as well as units in ODIN's mutual funds. The employees' own-account trading is to take place in accordance with ODIN Forvaltning AS's internal guidelines on employee own-account trading, which have been prepared pursuant to the Norwegian Securities Trading Act and the Norwegian Fund and Asset Management Association's industry standard.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

Risk measurement 30/06/2016

	Portfolio	Index
Volatility (3 years)	9,89	11,47
Active Share	47,69	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. The fund's share price fluctuations over the past five years put the fund in category 6.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

ODIN Forvaltning employees may trade for their own account in several types of financial instruments. This means that ODIN Forvaltning employees may own securities in companies that are referred to in this report as well as units in ODIN's mutual funds. The employees' own-account trading is to take place in accordance with ODIN Forvaltning AS's internal guidelines on employee own-account trading, which have been prepared pursuant to the Norwegian Securities Trading Act and the Norwegian Fund and Asset Management Association's industry standard.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. The fund's share price fluctuations over the past five years put the fund in category 6.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

ODIN Forvaltning employees may trade for their own account in several types of financial instruments. This means that ODIN Forvaltning employees may own securities in companies that are referred to in this report as well as units in ODIN's mutual funds. The employees' own-account trading is to take place in accordance with ODIN Forvaltning AS's internal guidelines on employee own-account trading, which have been prepared pursuant to the Norwegian Securities Trading Act and the Norwegian Fund and Asset Management Association's industry standard.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

Risk measurement 30/06/2016

	Portfolio	Index
Volatility (3 years)	10,52	10,70
Active Share	97,03	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. The fund's share price fluctuations over the past five years put the fund in category 6.

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. The fund's share price fluctuations over the past five years put the fund in category 6.

*The funds investment mandate and benchmark was changed as of the 30/11/2015. The historical returns shown before this date relates to matters from before these changes.
