2020 - A YEAR FOR THE HISTORY BOOKS - AND ODIN MARKS 30 YEARS AS A MANAGER

Now that a new year has started, we are confident that ODIN will continue to deliver good long-term returns for our customers in the next 30 years as well.

Bjørn E. Kristiansen CEO Not much more can be said about the pandemic. That these are 'peculiar times' and that 2020 was 'a different kind of year' have perhaps become clichés, but the fact is that a lot of things have changed now, and much is currently uncertain. We have had to learn a new way of living compared with what we are accustomed to and most of us have experienced heavy limitations on our freedom. It is probably no exaggeration to say that 2020 will be a year for the history books and that we will tell our children and grandchildren about what happened when everything closed down and everyone had to stay at home. There will be a lot of research into, and much written about, 2020 – about the pandemic itself, about its economic consequences, about how the authorities around the world managed the crisis, and about the impact the pandemic had on individuals.

One element of this history is that we are seeing people save more than before. This may be for a number of reasons. It may be that the restrictions imposed on us have resulted in us spending less money on everyday things and investments, and we have therefore had more money to save. It may also be the case that in uncertain times we try to save more so that we are better equipped for the future, and it may also be that many people have had more time to think about their personal finances. In ODIN we have noticed the greater interest in long-term saving. After the worst market turbulence settled down in March and April, we have seen ever more people wanting to save. This is a good development – long-term saving is a sensible thing for the vast majority of people – whether that is saving for their own pension or saving for a specific purpose, like a new home or the cabin of their dreams.

Another element of this history is that the financial markets, following dramatic falls in March and April, recovered and ended the year at record highs. This recovery was well aided by record low interest rates and generous government stimulus packages, although the markets have also been able to see through the pandemic we are in the midst of. This means that another element of this history of 2020 will be that it was also a good year for investments. It has definitely been a special year for ODIN. On the one hand we, like many others, have used home offices extensively and most of our communications with customers and other business contacts have been digital. At the same time, we have seen a year of strong growth. ODIN's assets under management grew by NOK 16.4 billion during 2020, an increase of 24 per cent. We contrib-

uted around NOK 13 billion in returns for our customers. This results in a capital-weighted average of well over 24 per cent. In other words, it has been a good year for unitholders in ODIN's funds. We have also seen a large influx of new customers, and never before have so many new savings agreements been signed.

The growth was especially strong in Sweden, where we managed 40 per cent more capital by the end of the year than at its start. This was partly due to good absolute and relative returns, and partly due to having gained so many new customers. At the beginning of the year, we launched ODIN Small Cap, a fund that has performed extremely well in its first year. ODIN Small Cap has provided a return of 56.8 per cent (unit class C) since its inception on 28 January 2020 and has already grown to NOK 2.9 billion in size. We are proud that the fund was named newcomer of the year by the Swedish fund trading site, Fondmarknaden.se.

ODIN 30 years old

The year 2020 also marked ODIN's 30th anniversary. ODIN Forvaltning AS was founded as a company called Independent Fund Management in February 1990. Our business concept involved starting an independent management company for

investments in the Nordic region, with offices in Oslo and Stockholm. ODIN's history in Sweden is, therefore, as long as its history in Norway. The company changed its named to ODIN Forvaltning in 1992 and the logo we still use to this day was adopted a year later. Given our focus on the Nordic market, turning to Norse mythology for both a name and a logo was not an unnatural choice. Odin was the most prominent of the gods. We read that not only did he stand for strength, he also stood for knowledge and wisdom. Odin's horse, Sleipner, was chosen as a symbol for our logo. The logo also includes a precise 'O' for Odin that also symbolises that Odin owned a magical gold ring, Draupne. It dripped eight new rings every ninth night that weighed just as much as it did. While it would be difficult to produce as equally fast and high returns as Odin's ring, it is nevertheless a good logo for a manager that aims to provide good long-term returns for its customers.

ODIN's basic investment philosophy has remained the same since it was founded; our big idea has been to be an active manager with a focus on long-term investments in quality companies.

ODIN's first fund was ODIN Norden, which mainly focused on Nordic equities. The fund can now point to a 30-year history, and it is with pride that we can state that we have

delivered an average annual return of 12.6 per cent to our customers (unit class C) over these years. Had you been in the fund the entire time, your money would have grown by a total of 3,667.6 per cent over that period. In other words, if you had invested NOK 100,000 in June 1990, that amount would have grown to almost NOK 3.7 million by the end of 2020. This shows that the long-term pays and that ODIN has delivered a very good return to its customers over time. Later on, more funds were established and today ODIN is a total provider of securities funds, offering equity funds, money market and bond funds, and balanced funds. We now also offer discretionary mandate management. ODIN has offices in Oslo, Bergen, Stavanger, Stockholm, Gothenburg, Malmö and Helsinki.

In ODIN's 30-year history, SpareBank 1 has been a strong, solid owner for 25 of these years, and in the last 20 years ODIN has been a wholly-owned company of SpareBank 1 Gruppen. Now that a new year has started, we are confident that ODIN will continue to deliver good long-term returns for our customers in the next 30 years as well.

We hope 2021 is a good investment year for you.

Bjørn Edvart Kristiansen, CEO

1990 - 2020

PANDEMIC AND STRIKING CONTRASTS

"It was the best of times, it was the worst of times, it was the age of wisdom, it was the age of foolishness, it was the epoch of belief, it was the epoch of incredulity, it was the season of light, it was the season of darkness, it was the spring of hope, it was the winter of despair."

~ Charles Dickens

The opening lines of Charles Dickens's famous novel A Tale of Two Cities describe the year just ended very well. The action takes place in London and Paris before and during the French Revolution, but it could just as easily have been about the financial markets and economy in 2020. It really has been a year full of contrasts. In many ways it has been the worst year for a long time with a pandemic that has killed millions of people and made even more unemployed. But it was also a year in which the stock markets ended at record highs. Many companies, especially those involved in consumption, e-commerce and IT have seen fairytale growth.

The main reason why the stock markets set new records was probably the fact that interest rates are low, and it appears that they will remain so for longer than expected, which makes equities relatively more attractive. The authorities in most countries have also stimulated their economies with enormous sums of money. Much of this went directly or indirectly to owners of companies, and not as much to the employees of those companies. The disparity between winners and losers, the rich and the poor, has never been greater. Contrasts and contradictions have become clearer and have dominated the news picture to a large extent. The turmoil in the USA in connection with the election is a reminder of how deep these divisions run, not just in the USA, but also in many other countries. Some 250 million jobs have been lost, four times as many as during the financial crisis. Most of these jobs were in typical low-wage sectors such as the restaurant, tourism and service industries. On the other hand, the owners of the major IT companies have never been richer. People with good, safe office

My primary duties will be to manage, refine and develop our investment philosophy and work methods. In ODIN, we will always strive to provide our unitholders with a competitive return.

> Alexander Miller CIO

jobs have worked from home and have largely been spared from the pandemic and unemployment. The coronavirus has hit the weak the hardest and has amplified much of the geopolitical tension we were experiencing prior to the pandemic.

Given this backdrop, it is with a mixture of fear and delight that I am starting my new job as ODIN's Chief Investment Officer. My primary duties will be to manage, refine and develop our investment philosophy and work methods. In ODIN, we will always strive to provide our unitholders with a competitive return. We believe that our best chance of success lies in being loyal to a well thought through and clearly grounded philosophy of quality. In ODIN, we are always on the lookout for companies with a good market position, high return on capital and not too much debt. We want to own these companies for as long as they meet our criteria. We also want these companies to be managed by people who share our focus on long-term value creation.

Sustainability has become an ever more important factor in management. ODIN's focus on quality companies is a good fit with a ESG framework. We are not indifferent to how our companies earn their money. ODIN wants to invest in companies that do their best to live up to the UN Sustainable Development Goals with respect to how they treat their employees, their owners and our planet. It is pleasing to see that our funds consistently achieve very good ratings from the Governance Group

and others as far as sustainability is concerned. Our customers should feel confident that we do not just look for companies that deliver good returns, but ones that also seek to do so in the most sustainable way possible.

We are pleased our unitholders saw a good return on their ODIN investments in 2020. Our equity funds rose by between 6.6 per cent and 58.1 per cent during the year, if we look at the funds' unit class A. Eight of ODIN's nine equity funds outperformed their respective benchmark indices. All of the major markets rose in 2020 in spite of the pandemic and the big stock market fall in March. Sweden was the best market in our universe, while the development of Oslo Børs and in Europe was somewhat weaker. In particular, many smaller Swedish companies experienced a strong year in 2020. The index rose by more than 30 per cent and our newly started ODIN Small Cap achieved a return of no less than 58 per cent between the day it was established, 28 January, and the end of the year.

Our money market and bond funds also did well. ODIN Kreditt ended the year with a return of 0.5 per cent after heavy falls in March and April when the stock market turbulence was at its worst. Our bond funds rose between 2 per cent and 3 per cent in 2020. ODIN Likviditet rose by 1.3 per cent, which we are very satisfied with given the low interest rates for bank deposits. The assets under management in our mon-

ey market and bond funds continue to grow. It is pleasing to note that our customers appreciate these funds and that we can provide competitive returns on these portfolios as well.

At the start of 2020, very few realised what the year would bring. As a wise person once said: prediction is hard, especially about the future. In ODIN, we do not choose companies based on our or other people's guesses about short-term market movements. Nevertheless, I would venture to point out some factors that we think will be very important in the year to come. Further upturns in the stock markets will be contingent on getting the pandemic under control. The greatest risk appears to lie in any setback in relation to vaccinating populations. In 2020, the financial markets were completely dependent on help from governments and central banks in the form of low interest rates, tax cuts and direct support for the economy. If these measures are phased out too quickly it may increase the risk of far more volatile stock markets. It would be like taking away the training wheels on a child's bike before the child is completely confident about riding unassisted. Major crises such as the one we have experienced in 2020 often include a Darwinian component. Many companies will emerge from the crisis stronger, while others will be lost. I am confident that the companies ODIN invests in will come through this crisis in good shape and that our investment philosophy will stand up well in the future too.

> Alexander Miller CIO

ODIN INTENSIFIED ITS FOCUS ON SUSTAINABILITY

Foto: Anita Arntzen

As a result of our tireless focus on sustainability, we are proud to have finalised ODIN's sustainability strategy for the next few years.

Ane S. Rongved Head of Sustainable Investments

In what became a different kind of year, 2020, we in ODIN took a diligent, structured approach to sustainability, as we have also done in recent years. Meanwhile, last year represented a further strengthening of this long-term, important work. As a result of our tireless focus on sustainability, we are proud to have finalised ODIN's sustainability strategy for the next few years. The sustainability strategy is an important, living document for ODIN. It is a constant reminder that we should be active owners who have a close relationship with, and influence over, the management of the companies. We want to offer responsible products to our customers, communicate and report plainly and clearly, build up knowledge, and make more sustainable choices internally. In 2020, we also employed more wise heads who will help us become even more sustainable in everything we do. All in all, 2020 thus marked a clear escalation of our focus on sustainability.

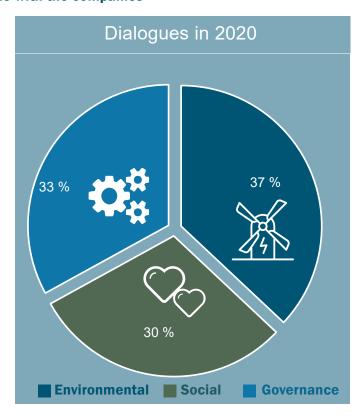

Despite the fact that 2020 became the year in which travel and physical meetings had to be less of a priority, we did not have less contact with the companies we own. If anything, the opposite is true. Our dialogue with these companies naturally moved from the physical to the digital meeting room. The dialogue with corporate leaders in the spring largely concerned Covid-19. How would the lockdown of society impact the companies financially and what would the employees' work situation be like? As a long-term shareholder, we encouraged, among other things, cuts in dividends and a focus on strengthening balance sheets. The annual general meeting season was also somewhat different in the past year. Some of the spring's annual general meetings were postponed, but we are pleased that the vast majority were instead conducted digitally.

Fruitful dialogue with the companies

We had a close relationship and dialogue with more of our companies in 2020. We participated in multiple stakeholder analyses on behalf of the companies that we are invested in. These are

surveys the companies conduct with their stakeholders, i.e. shareholders, employees, customers, suppliers and so on. They provide companies with useful insights into what the various groups think are important and can, among other things, be used in the development of strategy, for risk assessments and to identify new opportunities. We believe it is good for companies to conduct stakeholder analyses on a regular basis and feel that it is important for us as a shareholder to spend time on this.

During the year, we also asked many of the companies we are invested in for carbon emissions data. We encouraged those that do not report their climate emissions to start doing so, and

at the same time we encouraged those who do report them to use a standard reporting method. This makes it easier to make comparisons across companies. It is gratifying to see that we have already achieved breakthroughs with some companies. We will continue to engage with others.

We have also been involved in dialogues about subjects such as the EU's taxonomy, high-emission industries, labour rights and incentive programmes. You can read more about this in ODIN's sustainability report.

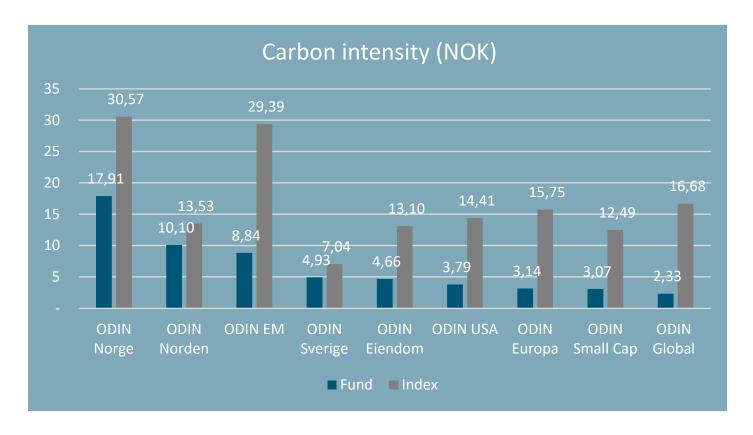

Active ownership and voting

In 2020, we cast 3,311 votes in 242 annual general meetings. Of the votes we have cast, we voted against the company's recommendations on 133 occasions. These typically included proposals related to incentive programmes, management and board remuneration issues, and the election of board members. We gave voting instructions for a total of 368 meetings in 2020, but unfortunately, for technical reasons, not all of them went through. The voting ratio for 2020 therefore ended up at 90 per cent. Now that the problem has been resolved, we are aiming for a voting ratio of 100 per cent in 2021.

In addition to voting at general meetings, we also sit on several nomination committees. The task of a nomination committee is to choose the company's board. This is an important task that we perform together with other major shareholders in the companies. As at 31.12.2020, we were on the following nomination committees: Multiconsult, Kongsberg Gruppen, Addnode, AQ Group, Byggmax, Addlife, Beijer Alma, Biotage, CTT and Munters.

Carbon footprint

We started to measure the carbon footprint of our portfolios as early as 2017. The carbon footprint at the fund level, here measured by carbon intensity, provides a picture of the scale of the emissions from the companies in a given portfolio measured against the revenues. The lower the number, the better. Not all companies report their carbon footprint and we have to estimate this based on comparable companies. We report our funds' carbon footprint in order to encourage companies to measure their own emissions and set clear targets for cutting them from current levels.

ODIN'S FUND MANAGEMENT TEAM

ALEXANDER MILLERChief Investment Officer

Experience

He has worked for ODIN since 2021. Alexander has worked in capital management and finance since the late 1990s and has extensive experience in the industry. He was Investment Director at Eika Kapitalforvaltning for two spells of four

years over the period from 1997 to 2006. He has also held this post during the last year prior to being recruited to the team at ODIN. From 2006 to 2015, he was head of Ferd Invest. From 2016 to 2019, he was Investment Director at Seatankers Management.

VIGDIS M. ALMESTAD Senior portfolio manager: ODIN Norge and ODIN Norden

Experience

She has worked for ODIN since 2016. Vigdis has worked as a fund manager for Avanse Forvaltning A/S and Folketrygdfondet (the government pension fund), been investment director for a private invest-

ment firm and deputy investment director at Orkla ASA. She also worked at the Norwegian Ministry of Finance.

HARALD NISSEN

Senior portfolio manager: ODIN Global and ODIN USA

Experience

He has worked for ODIN since 2010. Harald previously worked as a consultant in IT and technology. Harald was a major contributor to the start-up of ODIN Emerging Markets, which ODIN took in-house in 2010. Harald has worked as an

analyst on ODIN's global and European desks.

HÅVARD OPLAND

Senior portfolio manager: ODIN Europa and ODIN Global

Experience

He has worked for ODIN since 2006. Håvard has experience as a financial controller and analyst. He has in-depth knowledge of the international equity markets, focusing in recent years on Europe.

NILS HAST

Senior portfolio manager: ODIN Eiendom and ODIN's fixed interest funds

Experience

He has worked for ODIN since 2011. Nils has over 20 years' experience in the finance industry, both in Norway and abroad. Nils previously worked for SpareBank

1 SR-Fondsforvaltning, Bøhn Capital Management (hedge fund), Morgan Stanley and Credit Suisse First Boston.

MARIANN STOLTENBERG LIND

Senior portfolio manager: ODIN's fixed interest funds and ODINs balanced funds

For the last ten years, Mariann has worked as a portfolio manager in the Norwegian and international credit markets, and previously worked as a portfolio manager at

Storebrand Kapitalforvaltning. From Storebrand she also has experience as a credit analyst in the Norwegian fixed income and credit markets.

JONATHAN SCHÖNBÄCK

Senior portfolio manager:
ODIN Small Cap and ODIN Sverige

Experience

He has worked for ODIN since 2019. Jonathan worked as an asset manager at Handelsbanken where he was a part of the Selective fund management team from 2008. He was involved in all funds under

the umbrella of the Selektiv concept. As of June 2013, he was the principal person responsible for the AstraZeneca Allemansfond. As of January 2014, he was the principal responsible asset manager for Sweden Selective, and from 2017 head of Selective fund management until he left Handelsbanken.

DAN ERIK GLOVER

Portfolio manager: ODIN Emerging Markets and ODIN Aksje

Experience

He has worked for ODIN since 2015. Dan Erik has experience as an analyst at Swedbank in the E&P, cyclical industries and macro sectors. Dan Erik joined ODIN as an analyst in the international team.

HANS CHRISTIAN BRATTERUD

Portfolio manager: ODIN Small Cap and ODIN Sverige

Experience

He has worked for ODIN since 2018. Hans Christian has over six years' experience of financial analysis and valuation in EY (Ernst & Young), Stockholm, most recently as Senior Manager in Transaction Advi-

sory Services. He has also worked at Carnegie, DNB Markets and Swedbank. Hans Christian joined ODIN as an analyst on the Norden team.

ROBIN ØVREBØ

Portfolio manager:
ODIN Europa and ODIN USA

Experience

He has worked for ODIN since 2017. Robin took an interest in equities at a young age and has many years of experience as a private investor. As a private investor, Robin has been profiled in Dine Penger, E24

and Hegnar TV for his commitment to investment and the investment process. Robin joined ODIN as an analyst on the international team.

ODIN Eiendom

ODIN Small Cap

REPORT FROM THE BOARD OF DIRECTORS FOR 2020

ODIN's equity funds comprise the following funds: ODIN Norden, OIDN Norge, ODIN Sverige, ODIN Europa, ODIN Global, ODIN Emerging Market, ODIN USA, ODIN Eiendom and ODIN Small Cap.

It has been a good year for equity management in ODIN and we are pleased our unitholders saw a good return on their ODIN investments. Our equity funds rose between 5.8 per cent and 56.8 per cent during the year. Of ODIN's nine equity funds, eight of them matched or outperformed their respective benchmark indices. All of the major markets rose in 2020 in spite of the pandemic and the big stock market fall in March. Sweden was the best market in our universe, while the development of Oslo Børs and in Europe was somewhat weaker. In particular, many smaller Swedish companies experienced a strong year in 2020. The index (Carnegie Small Cap Return Index) rose by more than 30 per cent and our newly started ODIN Small Cap achieved a return of no less than 56.8 per cent between the day it was established, 28 January, and the end of the year.

The equity funds are managed according to an index-independent investment philosophy. The funds can invest freely within the limits stipulated in their regulations. The goal is to achieve the highest possible return on the fund's investments compared to the funds benchmark.

All ODIN equity funds apply unit classes, and these are subject to different management fees, see note 7. Unit classes A, B and C have different requirements in relation to the minimum subscription amount. Unit classes D and E are available to unitholders who subscribe via distributors who, by agreement with ODIN Forvaltning, cannot receive return commission.

There were no changes in the funds' mandates in 2020.

At the year-end 2020, ODIN Forvaltning AS managed:

Fund	Unit classes	Forvaltningskapital
ODIN Norden	A/B/C/D	19 394 585 523 NOK
ODIN Norge	A/B/C/D	8 021 103 553 NOK
ODIN Sverige	A/B/C/D	16 631 733 960 NOK
ODIN Europa	A/B/C/D	5 191 073 090 NOK
ODIN Global	A/B/C/D	8 361 956 329 NOK
ODIN Emerging Markets	A/B/C/D	1 701 845 630 NOK
ODIN USA	A/B/C/D	3 048 417 607 NOK
ODIN Eiendom	A/B/C/D	3 513 667 366 NOK
ODIN Small Cap (SEK)	A/B/C/D/E	2 892 991 234 SEK

Since 26 October 2020, DNB Bank ASA (org.no. 984 851 006) has been the trustee for all funds with the exception of ODIN Small Cap. The trustee for ODIN Small Cap is DNB Bank ASA, via its Swedish branch (org.no. 516406-0161).

Responsible sustainable management

ODIN maintains a strong focus on sustainability and in 2020 we adopted a new sustainability strategy for the next few years. The sustainability strategy is an important and living document that confirms that ODIN aims to be an active owner

that is close to and influences the management of the companies in which it invests. ODIN wants to offer responsible products to our customers, communicate and report plainly and clearly, build up knowledge, and make more sustainable choices internally. ODIN seeks to identify companies that create value in the long term. Therefore, it is important that ODIN maintains its focus on sustainability, corporate social responsibility and corporate governance in our investment analyses and decisions. The management integrates sustainability, corporate social responsibility and corporate governance into investment analyses based on the belief that companies that operate responsibly will also be those that create the highest long-term return.

Financial risk and risk management

The financial risk relating to investments in equity funds is traditionally measured as being the price volatility or fluctuations in the fund's unit values. Measured in this way, investments in shares and equity funds always involve a certain risk – in the sense that the value of the units will vary from day to day and over time. Equity funds should be a long-term investment alternative. The Norwegian Mutual Fund Association recommends a minimum investment period of at least five years.

The funds' performances are compared to their own benchmark indices. ODIN's managers may freely compose the funds' portfolios, irrespective of the benchmark indices to which the funds are compared. Since the funds are managed according to an index independent investment philosophy, performance will deviate from the benchmark indices. Over time, the result will be that the funds perform either worse or better than the benchmark indices. Historic returns in ODIN's various equity funds are available under each funds annual report.

The funds' independence of the indices and the manager's knowledge and experience are important prerequisites for good investment decisions. The investment decisions are based on a fundamental analysis and are made on the background of in-house company analyses. Monitoring of compliance with internal and external framework conditions is made by daily reports to the group management and the fund manager.

ODIN has a permanent function which is responsible for risk management. The company has established a risk-management strategy containing general guidelines for risk management in the mutual funds and risk profiles for each mutual fund. The function responsible for risk management monitors and measures the risk in relation to the funds' risk profiles.

Redemptions during the period

The funds have not experienced any extraordinarily large redemptions of units that have affected the value of their units during the year.

The companies' routines for subscribing for and redeeming units ensure equal treatment for the unit-holders.

REPORT FROM THE BOARD OF DIRECTORS FOR 2020

The largest amount redeemed in 2020 comprised:

Fond	Andelsklasser	i % av forvaltnings- kapital
ODIN Norden	A/B/C/D	1,29 %
ODIN Norge	A/B/C/D	0,19 %
ODIN Sverige	A/B/C/D	3,41 %
ODIN Europa	A/B/C/D	1,79 %
ODIN Global	A/B/C/D	0,82 %
ODIN Emerging Markets	A/B/C/D	2,04 %
ODIN USA	A/B/C/D	3,02 %
ODIN Eiendom	A/B/C/D	3,96 %
ODIN Small Cap (SEK)	A/B/C/D/E	2,75 %

Continued operations

All activity linked to the funds is carried out by ODIN Forvaltning AS. The various funds have in that respect no employees.

The fund's accounts have been prepared on the basis of the going concern assumption.

The management company, ODIN Forvaltning AS, is in a healthy economic and financial position, and has strong ownership in the form of SpareBank 1.

The profit for the year and their appropriation

The 2020 annual accounts show that the funds made the following profit:

Fund	Unit classes	Entire profit
ODIN Norden	A/B/C/D	4 661 588 000 NOK
ODIN Norge	A/B/C/D	592 944 000 NOK
ODIN Sverige	A/B/C/D	4 745 352 000 NOK
ODIN Europa	A/B/C/D	303 538 000 NOK
ODIN Global	A/B/C/D	1 215 350 000 NOK
ODIN Emerging Markets	A/B/C/D	227 110 000 NOK
ODIN USA	A/B/C/D	242 140 000 NOK
ODIN Eiendom	A/B/C/D	62 288 000 NOK
ODIN Small Cap (SEK)	A/B/C/D/E	698 336 325 SEK

The entire profit for the year has been allocated thus: transfer to equity for each individual fund or each class of fund.

The return achieved by the individual funds varies from year to year. All funds (unit class C) saw positive returns in 2020. Eight out of nine funds were ahead, or in line with their reference indices. The Board is also confident that the funds will achieve good returns, both in absolute terms and compared with their respective benchmarks over time.

Note 1 - Note on the principle

- Financial instruments
 - All financial instruments, including shares, bonds, certificates and derivates, are assessed at their actual value (market value).
- The determination of actual value

 The actual values of the securities in the fund's portfolio are determined on the basis of the sales prices in Blomberg at 4.30pm CET on each day that the stock market is open. If no sales of the securities have been registered on the stock exchange that day, an estimated sales value is used.
- Foreign currencies
 Securities and bank deposits in foreign currencies are evaluated at the daily rate (information from Blomberg at 4.30pm).
- Inclusion of transaction costs
 The transaction costs relating to the purchase of securities (broker's commission) are included in the securities' cost prices.
- Dividends to unit-holders
 The funds do not distribute dividends.
- Allocation of acquisition prices
 When the funds' securities are sold, the gain/loss on the
 sale is calculated based on the average cost price of the
 sold securities

Note 2 - Financial derivatives

The funds have not had any financial-derivative holdings during the year and do not have any at the year-end.

Note 3 - Financial market risk

The balance sheet in the funds' annual accounts reflects the funds' market value, in Norwegian krone (NOK), on the last stock-exchange day of the year. The funds are equity funds whose operations expose them to share-price and foreign-exchange risks. The management of the share-price risk is discussed below each fund. Please refer to this report for further details. The equity funds have an open foreign-exchange position.

Note 4 - Asset turnover

A fund's asset-turnover rate states the amount of securities purchased or sold by a fund during a period. A low asset-turnover rate indicates a lower rate of purchasing/selling activity (trading) than a high asset-turnover rate. The asset-turnover rate is calculated by taking the sum of all the fund's sales and purchases of securities, dividing this amount into two and then dividing the resultant figure by the fund's average total assets during the accounting year.

The funds' asset-turnover rates for 2020 were:

Fund	Unit class	
ODIN Norden	A/B/C/D	13 %
ODIN Norge	A/B/C/D	8 %
ODIN Sverige	A/B/C/D	27 %
ODIN Europa	A/B/C/D	21 %
ODIN Global	A/B/C/D	28 %
ODIN Emerging Markets	A/B/C/D	35 %
ODIN USA	A/B/C/D	38 %
ODIN Eiendom	A/B/C/D	90 %
ODIN Small Cap (SEK)	A/B/C/D/E	20 %*

Note 5/6 - Commission revenues/Costs

ODIN Forvaltning AS compensates the funds for brokerage costs in the case of large net subscriptions/redemptions.

Note 7 - Management fee

The management fees are calculated each day based on the fund classes' total assets according to that day's evaluation of the funds' assets. The fees are paid to the management company on a monthly basis.

The management fee for the funds or fund classes is:

Fund	Management fee
ODIN Norden A	0,75 %

ODIN Small Cap E	0,65 %

Note 8 - Other income and costs

Other portfolio income represents the difference between the original book value of foreign-currency bank deposits and the value of these deposits as at the latest market day.

Other income represents gains from underwriting fees (income from the funds underwriting a part of a share issue to the market). Other costs reflects the funds' delivery costs invoiced by custodian banks.

=Total tax cost in income statement	2 352 697	2 593 161

^{*)} Deferred tax is not capitalized in mutual funds

In those funds in a non-tax paying position in Norway, the tax cost consists of the net paid withholding tax.

Remuneration scheme

ODIN Forvaltning is subject to the regulations relating to the Act on Securities Funds of 21 Desember 2011 no. 1467, and the provisions on compensation schemes in the regulations relating to the Act on the Management of Alternative Investment Funds of 26 June 2014 no. 877, hereinafter called the Regulations. The Regulations are established by the Ministry of Finance pursuant to the Act on Securities Funds Section 2-16 and the AIF act Section 3-6. In addition, some supplementary provisions are provided in Commission Regulation 231/2013 article 107 for AIF. In line with the Regulations, the board of ODIN Forvaltning AS has a Remuneration Committee consisting of four board members. The remuneration schemes have been adopted by the Board of ODIN Forvaltning AS after discussion in the Remuneration Committee.

The Board acts on recommendations from the Remuneration Committee in setting the criteria for variable remuneration, and assesses target attainment and decides on the payment of variable remuneration.

The criteria for awarding variable remuneration are partly of financial character and partly related to the attainment of other targets relevant for the position category in question. For each position category, an upper limit for variable remuneration has been set.

The application of the remuneration scheme is evaluated each year by an independent control function. The evaluation shows that no circumstances have arisen that give reason to consider that the company's remuneration is not in accordance with the remuneration policy. There have been no significant changes to the remuneration policy in 2020.

All employees of ODIN Forvaltning receive a fixed remuneration. In addition, the CEO, members of the fund management team and employees in sales, distribution and marketing receive variable remuneration. A total of 41 of the company's employees were a part of this scheme in 2020, of which 13 were in fund management and 27 were in sales, distribution and market. Employees in control functions receive only fixed remuneration.

Four employees in management positions and eight portfolio managers were in 2020 subject to the rules on conditional payment of variable remuneration. For these positions, variable remuneration is earned over a period of two years and paid out over a subsequent period of three years.

The total salary payments in 2020 were NOK 99.1 million, of which NOK 74.2 million were fixed remuneration and NOK 24.9 million was total variable remuneration.

Risk measurement 31/12/2020

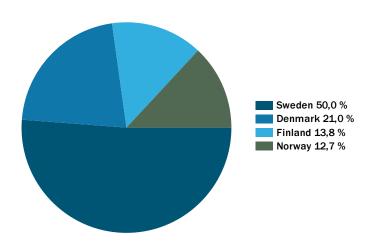

1	2	3	4	5	6	7		Portfolio	Index
Lower ri	sk		•		Hi	gher risk	Volatility (3 years)	15,65	11,36
Lower po	ssible return	1			Higher pos	sible return	Active Share	76,47	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

^{*} The classification is based on the Global Industry Classification (GICS) from MSCI AND Standard and Poor's.

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class.

Risk measurement 31/12/2020

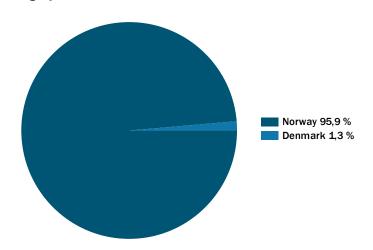

1	2	3	4	5	6	7		Portfolio	Index
Lower risk Higher risk		gher risk	Volatility (3 years)	18,03	18,28				
Lower pos	ssible return	<u> </u>			Higher pos	sible return	Active Share	50,04	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

^{*} The classification is based on the Global Industry Classification (GICS) from MSCI AND Standard and Poor's.

Benchmark	1,18	3,42	5,53	6,46	9,46	4,51

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class.

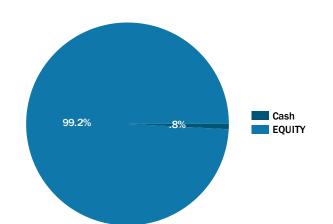

Risk measurement 31/12/2020

1	2	3	4	5	6	7		Portfolio	Index
Lower ri	Lower risk Higher risk		Volatility (3 years)	14,20	11,99				
Lower possible return Higher possible return		Active Share	91,89						

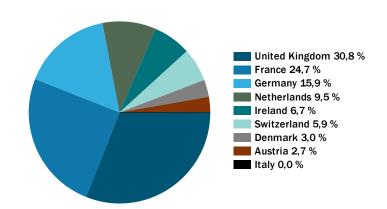

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

^{*}The fund's benchmark from the 1st of November 2018 is Morningstar Developed Markets Europe Large-Mid Cap NR USD

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

^{*} The classification is based on the Global Industry Classification (GICS) from MSCI AND Standard and Poor's.

Benchmark	0,46	12,47	12,13	11,45	14,02	5,76

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class.

Risk measurement 31/12/2020

1	2	3	4	5	6	7		Portfolio	Index
Lower ris	sk				Hi	gher risk	Volatility (3 years)	13,30	12,20
Lower pos	ssible return				Higher pos	sible return	Active Share	91,39	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

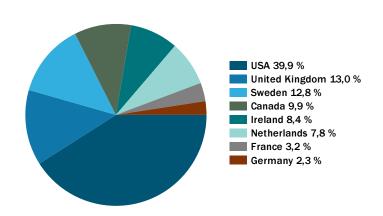

^{*}The fund's benchmark from the 1st of November 2018 is Morningstar Developed Markets Large-Mid Cap NR USD

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

^{*} The classification is based on the Global Industry Classification (GICS) from MSCI AND Standard and Poor's.

Benchmark	3,56	15,01	8,21	12,48	7,71	8,45

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class.

Risk measurement 31/12/2020

1	2	3	4	5	6	7		Portfolio	Index
Lower ris	sk	•	•		Hi	gher risk	Volatility (3 years)	12,66	12,64
Lower pos	ssible return	1			Higher pos	sible return	Active Share	87,00	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

 $^{^{\}star}$ The classification is based on the Global Industry Classification (GICS) from MSCI AND Standard and Poor's.

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class.

Risk measurement 31/12/2020

1	2	3	4	5	6	7		Portfolio	Index
Lower ris	sk	•	•		Hi	gher risk	Volatility (3 years)	21,54	19,49
Lower pos	sible return				Higher nos	sible return	Active Share	54,30	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

AUDITOR'S REPORT FOR 2020

KPMG AS Sørkedalsveien 6 P.O. Box 7000 Majorstuen 0306 Oslo Telephone +47 04063 Fax +47 22 60 96 01 Internet www.kpmg.no Enterprise 935 174 627 MVA

To the Board of Directors of ODIN Forvaltning AS

Independent Auditor's Report

Report on the Audit of Financial Statements

Conclusion

We have audited the financial statements of mutual funds listed below, which comprise the balance sheet as at 31 December 2020, the income statement for the year then ended, and a summary of significant accounting policies and other explanatory information. The financial statements show the following annual financial results:

ODIN Norden	NOK 4 661 588 366	ODIN Global	NOK 1	215 349 917
ODIN Norge	NOK 592 943 816	ODIN Emerging Markets	NOK	227 109 519
ODIN Sverige	NOK 4 745 351 637	ODIN USA	NOK	242 139 597
ODIN Europa	NOK 303 538 453	ODIN Eiendom	NOK	62 288 436

In our opinion, the financial statements are prepared in accordance with the law and regulations for mutual funds, and give a true and fair view of the financial position of the mutual funds as at 31 December 2020, and of their financial performance for the fiscal year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.

Basis for Opinion

We conducted our audit in accordance with the law, regulations and generally accepted auditing standards in Norway, including the International Standards on Auditing (ISAs). Our duties and responsibilities in accordance with these standards are described in Auditor's duties responsibilities for the audit of financial statements. We are independent of the mutual funds and the management company as required by the law and regulations, and have complied with our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the annual report but does not include the financial statements or our auditor's report thereon.

Our opinion on the audit of the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

AUDITOR'S REPORT FOR 2020

Auditor's Report - 2020 ODIN Forvaltning AS

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The Board of Directors and the Managing Director's Responsibility for the Financial Statements

The Board of Directors and the Managing Director of the management company ODIN Forvaltning ASare responsible for the preparation and fair presentation of these financial statements in accordance with the law and regulations and accounting standards and practices generally accepted in Norway Management is also responsible for such internal control as it deems necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the management company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The going concern assumption shall be used as the basis for the financial statements unless it is probable that the business will be liquidated.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the law, regulations and generally accepted auditing standards in Norway, including ISAs, will always detect a material misstatement when it exists. Misstatements can arise from fraud or error. Misstatements are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the law, regulations and generally accepted auditing standards in Norway, including ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due
 to fraud or error. We design and perform audit procedures responsive to those risks, and
 obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The
 risk of not detecting a material misstatement resulting from fraud is higher than for one
 resulting from error, as fraud may involve collusion, forgery, intentional omissions,
 misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the management company's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of
 accounting and based on the audit evidence obtained, whether a material uncertainty exists
 related to events or conditions that may cast significant doubt on the management company's
 ability to continue as a going concern. If we conclude that a material uncertainty exists, we are
 required to draw attention in our auditor's report to the related disclosures in the financial
 statements or, if such disclosures are inadequate, to modify our opinion about the financial
 statements and annual report. Our conclusions are based on the audit evidence obtained up
 to the date of our auditor's report. However, future events or conditions may cause the
 management company to cease to continue as a going concern
- evaluate the overall presentation, structure and content, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

AUDITOR'S REPORT FOR 2020

Auditor's Report - 2020 ODIN Forvaltning AS

We communicate with the board regarding, among other matters, the planned scope and timing of the audit. We also exchange information about significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal Requirements

Opinion on the Board of Directors' Report

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors' report concerning the financial statements, the going concern assumption and the proposal for the allocation of the profit is consistent with the financial statements and complies with the law and regulations.

Opinion on Accounting Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements (ISAE) 3000, "Assurance Engagements Other than Audits or Reviews of Historical Financial Information", it is our opinion that the management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the company's accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.

Oslo, 26 February 2021 KPMG AS

Geir Moen Chartered accountant (electronically signed)

The fund's assets will be invested in small and medium-sized companies in the Nordic region, but with the main emphasis on Sweden, and which have shares listed for trading on a trading venue in the EEA. Small and medium-sized companies in the Nordic region are companies that have registered an office or head office in a Nordic country, and which at the time of purchase by the fund have a maximum market value of one (1) per cent of the total market value for all shares listed on the Nasdaq OMX Stockholm (Stockholm Stock Exchange). The selection of shares and distributions between different industries and regions is not otherwise predetermined, which means that the fund's assets may, for example, be concentrated on a small number of industries from time to time.

The fund is a UCITS fund, which means that a maximum of 10 per cent of a UCITS fund's net assets may be invested in securities from a single issuer, and that investments of more than 5 per cent with a single issuer may not make up more than 40 per cent of the whole portfolio.

The fund's long-term goal is to achieve the highest possible return on the fund's investments compared with the fund's benchmark index, the Carnegie Small Cap Return Index.

ODIN Small Cap rose by 56.8 per cent (unit class C) from its inception on 28 January 2020 until 31 December 2020. During the same period, the benchmark index rose by 32.1 per cent.

The fund manager's investment philosophy is index-independent and the fund invests in shares following a fundamental analysis. The fund will therefore have a relative risk in relation to the fund's benchmark index. It is the opinion of the fund manager that the greatest risk of incurring losses is as a result of incorrect assessment in the company-specific investment analysis.

For much of the year the fund's largest position was Sinch, which is an example of digital communication that continues to grow. This is nothing new - it is a megatrend that has been going on for a long time, but it has strengthened in 2020. With the company also completing three of its four largest ever acquisitions during the year, the return has been extremely high.

At the portfolio level, the fund has had low exposure to industries and companies that have been hit hard during the coronavirus pandemic, which has contributed to a good return.

Positive contributors

Sinch has been by far the largest contributor during the year. The share has been so strong during the year that market value has grown from less than SEK 16 billion to over SEK 80 billion. When the company crossed the Small Cap limit of 68 billion, we started selling the share because we intend to only own companies within this limit.

Sdiptech, which supplies technology and solutions to the infrastructure sector, has also performed very well during the year, with strong reports each quarter and several promising acquisitions.

Lime Technologies, which supplies CRM software to companies, has also had an extremely good year driven by continued profitable growth.

MIPS, which makes protection systems for helmets that reduce harmful rotational forces, has been well run with continued high growth and very good profitability, and several new markets (e.g. motorcycle helmets) are also opening up.

Negative contributors

Loomis, which is a cash handling company, has performed very poorly on the stock exchange as cash handling in society has decreased somewhat as a result of the pandemic. If Loomis can return to its historic growth path, we believe the share will provide good returns in the future.

CTT Systems, which creates solutions for humidification and dehumidification for the aviation industry, is the company that has been hardest hit in terms of earnings. Despite a major loss in sales, CTT has remained profitable and the share price recovered somewhat towards the end of the year. The company is well positioned for an improvement in the aviation industry.

Coor Service Management, which is in the property management industry, was also negatively affected by the pandemic as a result of more people working from home and the resultant decline in the need for office support.

Absolent Group, which offers industrial air filter solutions, has also been impacted by the pandemic. The company has experienced impressive growth for many years, but margins began to be squeezed in 2019 and coupled with a fall in sales during the pandemic, margins have been squeezed further.

Changes

As mentioned, we had to sell Sinch when the company became too large. We replaced that position with Swedencare, which sells exclusive pet care products. The market has structural growth, driven by the fact that pets are increasingly seen as members of the family. Together with the fact that the company has gained momentum in its acquisitions, we believe it can be a good investment in the coming years.

We try to focus exclusively on long-term fundamental value performance. We aim to own our companies for a long time, and apart from the switch from Sinch to Swedencare, the list of portfolio companies has remained unchanged since inception.

REMUNERATION SCHEME

ODIN Forvaltning is subject to the regulations relating to the Act on Securities Funds of 21 Desember 2011 no. 1467, and the provisions on compensation schemes in the regulations relating to the Act on the Management of Alternative Investment Funds of 26 June 2014 no. 877, hereinafter called the Regulations. The Regulations are established by the Ministry of Finance pursuant to the Act on Securities Funds Section 2-16 and the AIF act Section 3-6. In addition, some supplementary provisions are provided in Commission Regulation 231/2013 article 107 for AIF. In line with the Regulations, the board of ODIN Forvaltning AS has a Remuneration Committee consisting of four board members. The remuneration schemes have been adopted by the Board of ODIN Forvaltning AS after discussion in the Remuneration Committee.

The Board acts on recommendations from the Remuneration Committee in setting the criteria for variable remuneration, and assesses target attainment and decides on the payment of variable remuneration.

The criteria for awarding variable remuneration are partly of financial character and partly related to the attainment of other targets relevant for the position category in question. For each position category, an upper limit for variable remuneration has been set. The application of the remuneration scheme is evaluated each year by an independent control function. The evaluation shows that no circumstances have arisen that give reason to consider that the company's remuneration is not in accordance with the remuneration policy. There have been no significant changes to the remuneration policy in 2020.

All employees of ODIN Forvaltning receive a fixed remuneration. In addition, the CEO, members of the fund management team and employees in sales, distribution and marketing receive variable remuneration. A total of 44 of the company's employees were a part of this scheme in 2019, of which 12 were in fund management and 25 were in sales, distribution and market. Employees in control functions receive only fixed remuneration.

Four employees in management positions and eight portfolio managers were subject to the rules on conditional payment of variable remuneration in 2020. For these positions, variable remuneration is earned over a period of two years and paid out over a subsequent period of three years.

The total salary payments in 2020 were NOK 99.1 million, of which NOK 74.2 million were fixed remuneration and NOK 24.9 million was total variable remuneration.

ACCOUNTING PRINCIPLES

The Fund's annual report has been prepared in accordance with The Swedish Mutual Funds Act (2004:46), the Swedish Financial Supervisory Authority's regulation (FFFS 2013:9) on mutual funds and the Swedish Investment Fund Association's guidelines for key ratio accounting of Swedish UCITS and special funds

Financial instruments

All financial instruments, such as shares, bonds, certificates and derivatives, are valued at fair value (market value).

Determination of fair value

Fair values for securities in the fund's portfolio are determined on the basis of observable trading rates from Bloomberg at 4:30 p.m. on each trading day. If no trading in securities has been registered on stock exchanges on that day, an estimated trading value is used.

Foreign currency

Securities and bank deposits in foreign currencies are valued at market prices (using information from Bloomberg at 4:30 p.m. on each trading day).

BehandTreatment of transaction costs

Transaction costs related to purchase of financial instruments (broker's commissions) are included in the cost price of the securities.

Distribution to unitholders

The funds do not distribute dividends.

Assignment of acquisition cost

When selling securities in the funds, capital gains/losses are calculated based on the average cost price of the securities sold.

Interest income

Interest income includes bank interest.

Sector classification

Classification is based on the Global Industry Classification Standard (GICS) from Morgan Stanley and Standard & Poor's

Turnover rate

The turnover rate is calculated in accordance with the Swedish Investment Fund Association's recommendation, i.e. the minimum value of total securities purchased and total securities sold in the period divided by average total assets in the period.

Rates of return and risk calculations

All rates of return are calculated based on prices as of 31.12.2020. The fund was registered as active with Swedish Financial Supervisory Authority on 19 December 2019, the first subscription in the fund was on 28 January 2020. This has therefore been used as the start date in the calculations.

60 — Annual Report 2020

AUDITOR'S REPORT ODIN SMALL CAP FOR 2020

To the unit holders in ODIN Small Cap, corporate identity number 515603-0735

Report on the annual report

Opinions

As auditors of ODIN Fonder, a branch of ODIN Forvaltning AS, Norway, corporate identity number 516402-8044, we have audited the annual report of ODIN Small Cap for the financial year 28/01/2020 - 31/12/2020 with the exception of the sustainability information on pages 58-59.

In our opinion, the annual report has been prepared in accordance with the Swedish Investment Funds Act and the Swedish Financial Supervisory Authority's regulations relating to mutual funds, and provides a true and fair view of Odin Small Cap's financial position as of 31 December 2020 and of its financial results for the year in accordance with the Swedish Investment Funds Act and the Swedish Financial Supervisory Authority's regulations relating to mutual funds. Our opinions do not include the sustainability information on pages 58-59.

Basis for opinions

We conducted our audit in accordance with the International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities in accordance with these standards are described in more detail in the Auditor's responsibilities section. We are independent in relation to the fund management company in accordance with good accounting practice in Sweden and have otherwise fulfilled our professional ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate as a basis for our opinions.

Information other than the annual report

This document also contains information other than the annual report and can be found on pages 58-59. The fund company is responsible for this other information.

Our statement regarding the annual report does not include this information and we make no statement supporting this other information.

In connection with our audit of the annual report, it is our responsibility to read the information identified above and consider whether the information is materially inconsistent with the annual report. In this review, we also take into account the knowledge we have otherwise acquired during the audit and assess whether the information otherwise appears to contain significant inaccuracies.

If, based on the work that has been done regarding this information, we conclude that the other information contains a material error, we are obliged to report this. We have nothing to report in this regard.

Responsibilities of the Fund Company

The fund company is responsible for the preparation of the annual report and ensuring that it provides a true and fair view in accordance with the Swedish Investment Funds Act and the Swedish Financial Supervisory Authority's regulations relating to mutual funds.

The fund company is also responsible for such internal control as it deems necessary to enable the preparation of an annual report that is free from material misstatement, whether due to irregularities or mistakes.

Auditor's responsibility

Our objective is to obtain reasonable assurance as to whether the annual report as a whole is free from material misstatement, whether due to irregularities or mistakes, and to provide an audit report containing our statement. Reasonable assurance is a high degree of assurance, but is no guarantee that an audit conducted in accordance with ISA and generally accepted auditing standards in Sweden will always detect a material misstatement if one exists. Misstatements can occur dur to irregularities or mistakes and are considered material if, individually or together, they can reasonably be expected to influence the financial decisions of users taken on the basis of the annual report.

As part of an audit in accordance with ISA, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

 $Audit\ Report\ for\ ODIN\ Small\ Cap,\ corporate\ identity\ number\ 515603-0735,\ 28/01/2020\ -\ 31/12/2020$

AUDITOR'S REPORT ODIN SMALL CAP FOR 2020

- identify and assess the risks of material misstatement in the annual report, whether due to irregularities or mistakes, design and perform audit procedures based on these risks, among other things, and obtain audit evidence that is sufficient and appropriate to form the basis of our statement. The risk of not detecting a material misstatement due to irregularities is higher than for one resulting from a mistake, as irregularities may include collusion, forgery, intentional omissions, incorrect information or breach of internal control.
- gain an understanding of the part of the fund company's internal control that is important for our audit in order to design audit measures that are appropriate in the circumstances, but not to express and opinion on the effectiveness of the internal control.
- evaluate the appropriateness of accounting principles used and the reasonableness of the estimates in the accounts and related disclosures made by the fund company.
- evaluate the overall presentation, structure and content of the annual report, including the disclosures, and whether the annual report presents the underlying transactions and events in a way that gives a true and fair view.

We must inform the fund company of, amongst other matters, the planned scope and timing of the audit. We must also provide information on significant observations during the audit, including any significant deficiencies in internal control that we have identified.

The auditor's opinion on the statutory sustainability information

The fund company is responsible for the sustainability information on pages 7-8 and for its preparation in accordance with the Swedish Investment Funds Act.

Our review of the fund's sustainability information has been conducted with guidance, where applicable, from FAR's recommendation RevR 12 *Auditor's Opinion on the Statutory Sustainability Report.* This means that our review of sustainability information has a different focus and a significantly smaller scope compared with the focus and scope of an audit in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. We believe that this review provides us with a sufficient basis for our statement.

Sustainability information has been provided in the annual report.

Stockholm, 22 February 2021 KPMG AB
