This semi-annual report was originally prepared in Norwegian. This is an unofficial translated version and no liability is assumed for any errors or ambiguities that may have arisen in connection with the translation. The original version of this semi-annual report is available in Norwegian and can be ordered from ODIN Fund Management.

Statements in this semi-annual report reflect ODIN's views on the market at the time when the semi-annual report was published.

This report shows past performance. Past performance is no guarantee for future performance. Future performance will depend on things such as movements in the market, the manager's skills, the fund's risk level and the costs of managing the funds. The value of the fund may decrease as a result of a fall in share prices. All return figures are stated in NOK, unless otherwise stated.

The Company is a fully owned subsidiary of SpareBank 1 Gruppen AS

August 2020

Reflections from the CEO

A first half year of major fluctuations

The first half of 2020 is six months that will be something for the history books. What we experienced at the beginning of March, when Norway, together with most Western countries, shut down their societies to fight a pandemic is something we will be telling our grandchildren about.

Crises and important truths

The world's financial markets were severely shaken, and there was a lot of talk of the world facing its biggest recession since the 1930s. The stock market is periodically hit by various crises. Every crisis teaches us something new and also reminds us of some important truths about the stock market.

The most obvious truth we have been reminded of this year is that the stock market fluctuates. Over time, the stock market rises, but there are many ups and downs along the way. These fluctuations reflect the risk inherent in the stock market, and stocks yield thus higher returns than risk-free alternatives over time.

We aim to deliver good long-term results to our customers through management that is marked by a long-term perspective, and we see that we do the best for our customers who invest with us over time.

- Bjørn Edvart Kristiansen

ODIN model and solid companies

The corona crisis has also highlighted the importance of owning solid companies. Companies with strong balance sheets, i.e. a low level of debt, have the flexibility to navigate their way through an economic downturn. When we think of solid companies we also think of companies that have strong market positions, which sell products that are of great value to their customers, and who often have more legs to stand on when a customer group or market fails. In good times it is easy to underestimate the value of owning solid companies.

At ODIN, we are committed to own solid companies, preferably over a long period of time. It is also the case that there are a number of companies we own that will increase their earnings throughout the crisis. We are thinking in particular of several IT and software companies, where there has been a greater demand for their products and services as a result of shutting down the economies and more home offices throughout the world.

Recovery in the stock market

We see that the market has shifted further towards tomorrow's winners. Software companies and other technology companies have been priced up, while oil companies have been priced down.

The stock market has recovered much of the fall from earlier this year, and today it appears as if the market has largely priced in the negative effects of the Corona crisis as being of a temporary nature. This strong recovery in the markets is attributed to several factors.

Firstly, the economic stimulus from central banks and governments has been very strong, and the scope has been greater than during previous crises. What sets this economic crisis apart from the financial crisis, for example, is the fact that this is a crisis created by the fact that the authorities themselves decided to shut down on behalf of society to reduce the spread of infection. As a result of this, the central banks and the authorities have introduced stimulus packages quicker than in the past.

Secondly, the stock market has as usual been quick to price in better economic conditions in 2021. Even though earnings growth will be negative for many companies in 2020, the market has chosen to focus on 2021, where the current expectations are for strong earnings growth – the stock market is and will remain a market of expectations.

Thirdly, the stock market has priced in low interest rates for a long time to come. Low interest rates increase the present value of future cash flows and thus the current values of companies. Low interest rates also mean that more money will flow into the stock market, since there are few other alternatives for achieving a return.

Good performance

ODIN has performed well in the first half of 2020. We have gained market share, and most of our equity funds have delivered a return on par with or better than the in-

dex against which we measure our return. It is also the case that most of our customers, despite a challenging market, have actually had positive returns in the first six months of the year. However, there are large variations. The Norwegian market has yielded a negative return of 13 per cent, while our Nordic and Swedish mandates have yielded a return ranging from 7.6 per cent to 11 per cent. It is especially pleasing for us at ODIN to see that the most recent fund we launched, ODIN Small Cap, has reported a return that is 9.1 percentage points better than the index since its inception on 28 January this year. However, at ODIN the long-term perspective is nonetheless the most important.

30 years of fund management

ODIN was established in February 1990, and on 1 June of the same year, ODIN Norden, which has become the flagship of the ODIN portfolio, saw the light of day. Today we have offices in Oslo, Helsinki, Stockholm, Gothenburg, Bergen and Stavanger.

When ODIN was established, our aim was to offer equity fund management in the Nordic countries based on long-term, value-oriented management. Our index-independent and value-based investment philosophy was the foundation of our business concept and still guides how we invest.

Our logo and our name denote our Nordic heritage, a strong culture we are proud of. This lays the foundation for what we do and how we do it. We work to ensure that you can meet the future well prepared as a customer. It is about creating value for the future.

Bjørn Edvart Kristiansen
Acting CEO

ODIN

Our vision is; ODIN creates value for the future.

Value creation is what we work with at all levels within the organisation.

- We create value for our unit holders through good management and advice
- We create value for our employees through work that gives them personal and professional development
- We create value for our owners through good results.

Environmental, Social and Governance

Sustainability on the agenda

Ane S. Rongved, Head of Sustainable Investments

Throughout the first half of the year, we have continued to work on ODIN's approach to sustainability internally. As a result of regular meetings of the ESG committee and board meetings, we have set out ODIN's sustainability strategy for the coming years.

Despite the fact that the last six months have been rather different, this does not mean that we lost focus on the companies. Quite the contrary. Dialogue with the companies has transitioned from physical meeting rooms to digital solutions. Dialogues in recent months have largely been related to Covid-19 and how the lockdown of society has affected companies, both in financial terms and with regard to the employment situation of their personnel. Some AGMs this spring were postponed, but the vast majority took place digitally.

As previously mentioned, we have spent a great deal of time at AGMs and engaged in dialogue with the companies that we are invested in - especially during the period when the storm was at its worst. As long-term shareholders, we encouraged cuts to dividends and a focus on strengthening balance sheets. The primary focus of these companies during this period, beyond ensuring the safety and security of their employees, has been to equip themselves for storms in the future.

We have been engaged in dialogue with several companies this spring. We have participated in multiple stakeholder analyses on behalf of the companies that we are invested in. These are surveys carried out by companies on their stakeholders (shareholders, employees, customers, suppliers, etc.). This provides the company with useful insight into what the different groups prioritise, and can be used when preparing strategy, during risk assessment and while evaluating future opportunities, etc. We believe it is a positive action for companies to carry out stakeholder analyses on a regular basis, and we feel that it is an important task for us as a shareholder to dedicate time to this.

We have also been in touch with several of the companies that we are invested in to request data relating to carbon emissions. We have encouraged those that do not report on this to start doing so, and we have also urged those that do report to use the same reporting standards so that we can more easily compare figures across companies. It is gratifying to see that we have already achieved breakthroughs with some businesses, while we are continuing to engage with others.

Over the course of the first six months of this year, we have cast 2,675 votes at 182 AGMs. Of the votes we have cast, we voted against the company's recommendations on 93

occasions. These include proposals related to incentive programmes, management and board remuneration issues and the election of board members.

In addition to voting at AGMs, we also sit on several nomination committees. The task of a nomination committee is to choose the company's board. This is an important task

that we perform together with other major shareholders in the companies. As at 30.06.2020, we are on the following nomination committees: XXL, Multiconsult, Kongsberg Gruppen, Protector Insurance, AQ Group, Beijer Alma, Byggmax, Addnode, Biotage and Addlife.

Our observations- and exclusion list per 30.06.2020:

Watchlist			
Date	Company	Fund	Cause
04.07.2018	Danske Bank	ODIN Kreditt, ODIN Europeisk Obligasjon	Money laundering accusations
11.09.2018	Wells Fargo	ODIN USA	God business practice
22.03.2019	Swedbank	ODIN Kreditt	Money laundering accusations
14.11.2019	DNB	ODIN Kreditt/ODIN Europeisk Obligasjon/ODIN Norge/ODIN Norsk Obligasjon/ODIN Likviditet	Money laundering accusations
19.11.2019	SEB	ODIN Kreditt	Money laundering accusations
Exclusions list			
Date	Company	Fund	Cause
01.02.2019	Fortive Corp.	ODIN USA	Involved in nuclear weapons

Signatory of:

Carbon footprint

In 2017 we started to measure the carbon footprint of our portfolios. The carbon footprint, here measured by carbon intensity, provides a picture at the fund level of the scale of the emissions from the companies in a given portfolio measured against the revenues. The lower the number, the better. Not all companies report their carbon footprint and we have to estimate this based on comparable companies. The reason for reporting the carbon footprint for our funds is to induce companies to measure their own emissions and set targets to reduce them from today's levels.

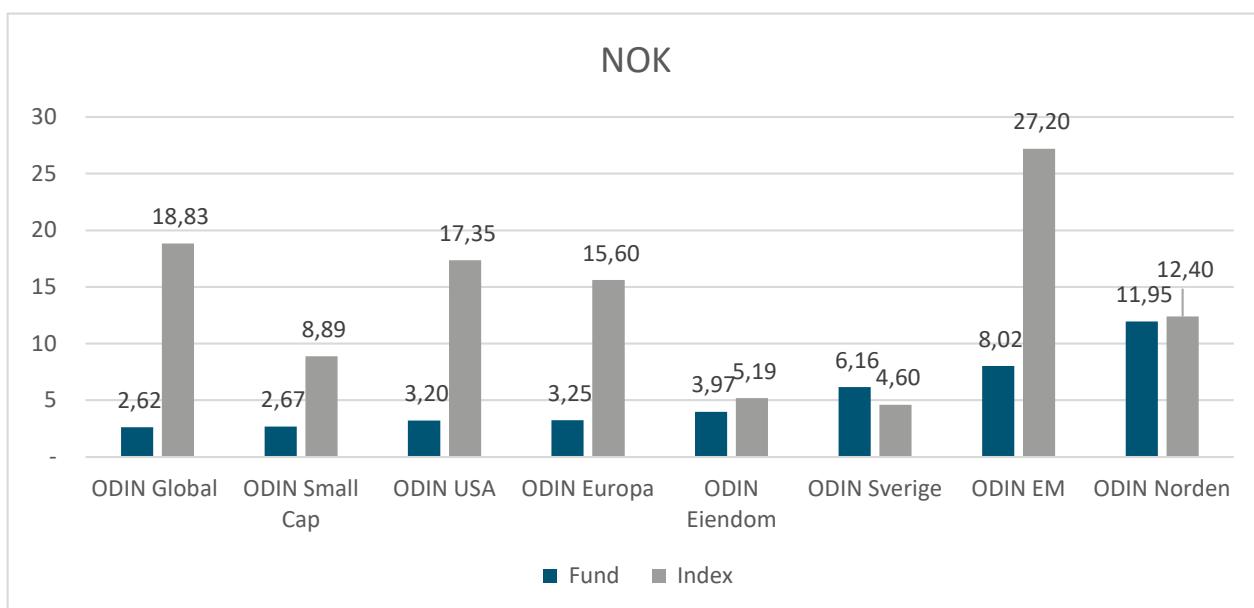

Read more about social responsibility and corporate governance here >>

Our goal

Our goal is to create value for our customers. The focus on sustainability will be an important contributor to value creation in our companies going forward. Companies with a clear focus on sustainability will reduce operational and regulatory risks. They will also be able to obtain cheaper financing for their business. Companies that prioritise environmental and social responsibility are often also rewarded in the form of employee and customer loyalty.

As shareholders, we can influence the companies we own to prioritise environmental and social responsibility, and

thereby creating strong and sustainable business models that are geared for the future. From a global perspective, ODIN is a small player and our ability to influence the largest companies is often limited. We are, however, invested in several small and medium-sized companies, where we are large shareholders and our voice is heard, and we believe we can make a difference.

* The carbon footprint provides a historical snapshot of the emissions from the companies in a mutual fund portfolio. Because emissions data is mainly published in the companies' annual reports, the carbon footprint is based on reported and estimated data for 2018. Data for 2019 will be available during 2020.

Benchmark	1,55	7,97	20,33	9,06	9,86	13,17	9,91

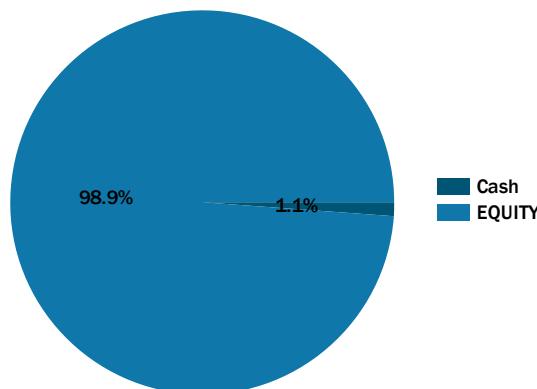

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class. Returns for periods exceeding 12 months are annualized.

Risk measurement 30/06/2020

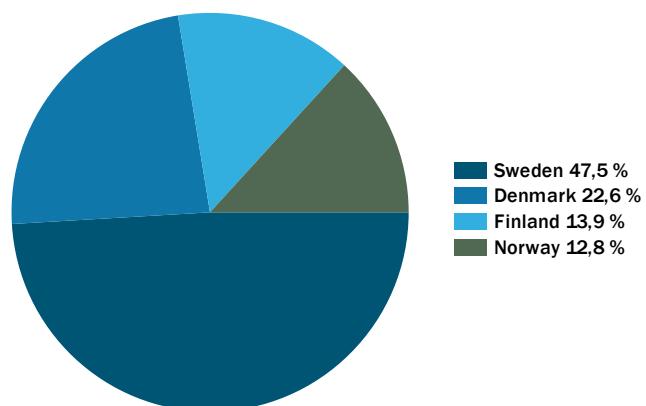

1	2	3	4	5	6	7	Portfolio	Index
Lower risk						Higher risk	Volatility (3 years)	14,83
Lower possible return						Higher possible return	Active Share	74,73

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

* Sector distribution is based on Global Industry Classification Standard (GICS) from MSCI & Standard AND Poor's. Geographic distribution based on MSCI Country Classification Standard.

Benchmark	0,27	-13,56	-5,65	5,02	5,38	9,66	9,96

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class. Returns for periods exceeding 12 months are annualized.

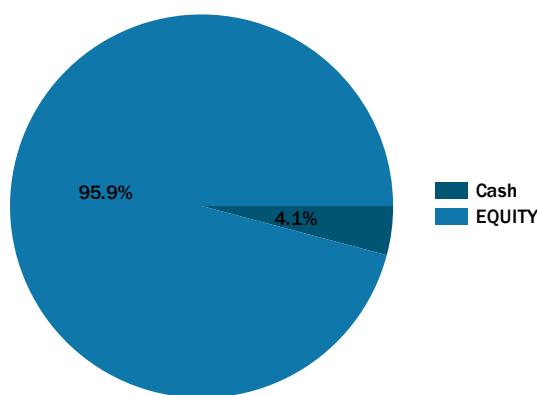

Risk measurement 30/06/2020

	Portfolio	Index
Volatility (3 years)	16,12	16,21
Active Share	44,85	

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

This fund and ODIN Forvaltning AS are registered in Norway and regulated by Finanstilsynet (the Financial Supervisory Authority of Norway).

Please note that the historical return is not a guarantee of future returns. The future return will among other things depend on market developments, the manager's skills, the fund's risk level and the costs of buying units and managing the fund. The return may be negative as a result of share losses.

Employees at ODIN Forvaltning AS are not allowed to trade in individual instruments such as shares and bonds. Employee self-trading must take place in accordance with ODIN Forvaltning AS's internal guidelines for self-trading.

ODIN Forvaltning AS may only be held responsible for information in this document that is misleading, inaccurate or inconsistent in relation to relevant information in the prospectus.

* Sector distribution is based on Global Industry Classification Standard (GICS) from MSCI & Standard AND Poor's. Geographic distribution based on MSCI Country Classification Standard.

Benchmark	3,42	-4,03	6,11	5,06	5,89	9,98	4,24

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class. Returns for periods exceeding 12 months are annualized.

Risk measurement 30/06/2020

	Portfolio	Index
Volatility (3 years)	13,54	11,21
Active Share	89,63	

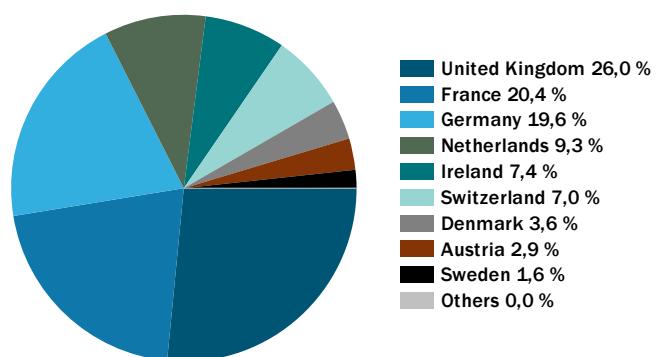

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

*The fund's benchmark from the 1st of November 2018 is Morningstar Developed Markets Europe Large-Mid Cap NR USD

Returns prior to the share class inception date are based on calculations from the fund's oldest share class, taking into account the management fee in each share class. Returns for periods exceeding 12 months are annualized.

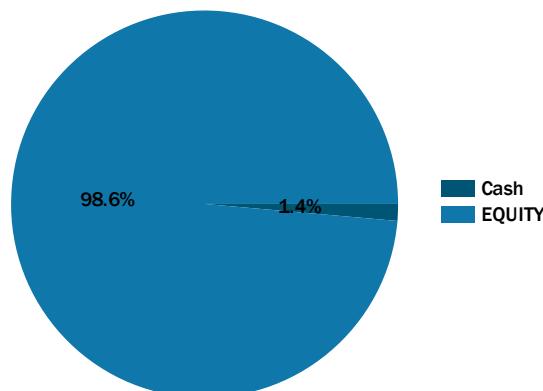

Risk measurement 30/06/2020

The above risk scale shows a link between the risk level for and possible return on an investment in the fund. A high figure means the fund is exposed to a high level of risk, i.e. large share price fluctuations. If the figure is low, the risk level is low. Note that category 1 in the above scale does not mean the investment is risk-free. The historical data used to calculate the risk level do not necessarily provide a reliable picture of the fund's future risk profile. There is no guarantee that the current risk level will remain unchanged. The fund may be included in a different risk category in the future. The risk indicator does not take into account devaluations, political initiatives or sudden fluctuations in the stock market. Risk figures calculated on the basis of returns in the C-Class.

*The fund's benchmark from the 1st of November 2018 is Morningstar US Large-Mid Cap NR USD
